

Sarth Mishra

mishrasarth2186@gmail.com • LinkedIn • GitHub • LeetCode

Summary

Computer Science and Engineering undergraduate focused on Java, backend development, and software engineering. Experienced with Spring Boot, Spring Security, RESTful APIs, JPA/Hibernate, SQL, PostgreSQL. Built secure backend applications involving authentication, authorization, database management, API development, validation, exception handling, testing, debugging, and layered application architecture.

Education

Noida Institute of Engineering and Technology

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.88

Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Experience

Software Engineering Virtual Experience — Accenture (Forage) [Certificate]

Jul 2025 – Aug 2025

Software Engineering Intern, Remote

- Applied Agile and SDLC practices through end-to-end software development simulations.
- Performed requirements analysis, debugging, and unit testing to improve software quality and reliability.
- Practiced implementation, testing, debugging, and iterative problem solving throughout development workflows.

Cognifyz Technologies [Certificate]

Jul 2024 – Aug 2024

Software Development Intern, Remote

- Developed an interactive Python game using Tkinter with a graphical interface and real-time user feedback.
- Implemented gameplay logic using random number generation, input handling, validation, and dynamic responses.

Projects

QuizApp — REST API Quiz Application *Java 21, Spring Boot, Spring Web MVC, Spring Data JPA, PostgreSQL* GitHub

- Developed the backend foundation of a quiz application using Java 21, Spring Boot, Spring Web MVC, and PostgreSQL.
- Designed a **Question** entity and implemented Spring Data JPA repository support for persistent question management.
- Configured PostgreSQL database integration and structured the application using Maven and Spring Boot for maintainable backend development.
- Applied object-oriented design and layered backend principles while organizing domain entities and persistence components.

SecureNotes — Secure Knowledge Management API *Java, Spring Boot, Spring Security, JPA, Hibernate, SQL* GitHub

- Developed a secure RESTful API for authenticated users to create, retrieve, update, and delete personal notes.
- Implemented authentication and authorization using Spring Security, custom **UserDetailsService**, BCrypt, validation, pagination, JPA/Hibernate persistence, and user-specific resource ownership.
- Designed a layered architecture using Controller, Service, Repository, DTO, Security, and Exception components.
- Applied database-backed authorization to ensure authenticated users can access and modify only their own resources.

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL
- **Backend:** Spring Boot, Spring MVC, Spring Security, RESTful APIs, JPA.
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite, H2
- **Concepts:** Object-Oriented Programming, Data Structures and Algorithms, Java Collections, Exception Handling
- **Tools:** Git, GitHub, Maven, IntelliJ IDEA, VS Code, Postman
- **Frontend:** HTML, CSS, React.js

Problem Solving

- Solved **330+ LeetCode problems**, primarily in Java, covering arrays, strings, hashing, binary search, linked lists, stacks, queues, and sliding window patterns.
- Earned the **200 Days Badge 2026** and participated in 9 LeetCode contests through consistent problem-solving practice.

Certifications

- **Core Java:** OOP, exception handling, collections, and core Java APIs.
- **Data Structures and Algorithms:** Recursion, sorting, searching, and algorithmic problem solving.
- **Object Oriented Programming:** Abstraction, encapsulation, inheritance, and polymorphism.
- **Introduction to MongoDB:** Database design, collections, documents, and CRUD operations.
